**Attachments:** FY07Food&DrugRpt.doc

Hi Julie,

The Division of Food and Drugs has asked for a more detailed breakdown of the "Others" category on our FY07 annual report. Specifically they are looking for prescription drugs. There are some drugs (morphine, fentanyl) that probably start life in prescription form in a vial or tablet but we see as powders or residues, so it is not always easy to define "prescription drugs". At any rate I prepared the attached report for them; this is the same report that I gave them last year. If you don't have any comments or additions, I'll send it on.

Cam

Mr. Salemi,

Over the past several years you have been kind enough to provide data for our DOJ grant proposals. Specifically you have sent us the percent of police department drug seizures categorized as "Other." That category included prescription drugs. Is that still the case or is there now a "prescription drug" category? If you have any separate information on RX drugs, I would be very interested in that data.

If however, the "Other" category still has RX drugs included, would you please provide, if available, the percentage of "Other" for FY07?

Thank you, Adele
